3.63.020 Establishing the Transportation Benefit District. At a minimum, if the District funding participation in a transportation improvement exceeds its original cost by more than twenty percent (20%) as identified in the District's original plan, a public hearing shall be held to solicit public comment regarding how the cost change should be resolved.

D. The Board shall issue an annual report, pursuant to the requirements of RCW 36.73.160(2).

3.63.040 Functions of the District.

The funds generated by the Transportation Benefit District may be used for transportation improvements that preserve, maintain, operate, construct and reconstruct the existing transportation infrastructure of the City, consistent with chapter 36.73 RCW, as it now exists or is hereafter amended. In addition to the foregoing, the funds generated may be used for any purpose allowed by law, including to operate the District and to make transportation improvements that are consistent with state, regional and local transportation plans and necessitated by existing or reasonably foreseeable congestion levels, pursuant to chapter 36.73 RCW. The District shall select to the extent practicable projects for funding that reduce the risk of transportation facility failure and improve safety, decrease travel time, increase daily and peak period trip capacity, improve modal connectivity, provide for economic development, improve accessibility for persons with special transportation

needs, and preserve and maintain optimal performance of the infrastructure over time to avoid expensive infrastructure construction and replacement in the future.

All funds raised through the District shall be expended only for such construction, reconstruction, preservation, maintenance and operation, including administrative costs, in accordance with the provisions of chapter 36.73 RCW as it now exists or is hereafter amended. The funds expended by the District shall preserve, maintain, operate and improve the City's investments in the transportation infrastructure, reduce the risk of transportation facility failure, improve safety, continue the cost effectiveness of the City's infrastructure investments, provide for economic development and continue the optimal performance of the transportation system.
