Section 10. Temporary Aesthetic Water Quality Rate Reduction

On January 31, 2013, the City of Longview discontinued supplying its customers with water from the Cowlitz River and began supplying treated groundwater from the Mint Farm Regional Water Treatment plant. Several months later a limited number of customers began experiencing water quality issues due to destabilization of scale build up in the City's water mains. Although the water meets potable standards, objectionable odor, color, and taste characteristics have been experienced by a limited number of customers. As acknowledgement that some customers may receive water with objectionable aesthetic characteristics impacting their daily lives, the following reduced rates will be charged to certain qualifying customers.

10.1 Eligibility for Aesthetic Water Quality Rates

Eligibility for Aesthetic Water Quality Rates shall be based on water quality at a specific customer's location.

A. Eligibility: Customers may be eligible for Aesthetic Water Quality Rates upon request by the customer and after verification by City staff that the customer has experienced aesthetic water quality issues related to iron and/or manganese concentrations in the customer's water supply. Customers dealing only with spotting and other issues related to hardness and dissolved solids concentrations, chlorine odor or taste, or other issues not related to iron or manganese concentrations, are not eligible for Aesthetic Water Quality Rates. Eligibility for Aesthetic Water Quality Rates shall be determined by City staff based one or more of the following methods:

- i) Water sample collected by City staff from the water main serving the customer containing iron concentration greater than the state Dept. of Health established Secondary Maximum Contaminant Level of 0.3 mg/l.
- ii) Water sample collected by City staff from the water main serving the customer containing manganese concentration greater than the state Dept. of Health established Secondary Maximum Contaminant Level of 0.05 mg/l.
- iii) Water sample collected by City staff from the water main serving the customer with an apparent color reading of greater than 15 color units.
- iv) Non-quantifiable characteristics as determined by the Public Works Director or his/her designee.
- v) Eligibility testing of a customer's water shall occur no more frequently than once per week. After two tests fail to meet the eligibility criteria, the City will not conduct any further eligibility tests for that customer unless the City identifies a general deterioration of water quality in the City's mains in the area of the customer.

B. Eligibility Period

Customers shall be eligible for the Aesthetic Water Quality Rates for a period of two (2) months, after which continued eligibility must be determined in accordance with section 10.1.A.
