

Longview School District
School Access Project Requests Submitted to City of Longview
February 4, 2016

Projects

1. Columbia Valley Gardens Elementary School: Install a marked mid-block crossing with longitudinal (high-visibility) markings between Pine Street and Pennsylvania Street. Remove the marked crossings and associated School Crossing Assemblies at Pine Street and Pennsylvania Street to encourage use of the mid-block crossing.
2. Kessler Elementary School: Improve the Beach Street crossing with landing area in center for students and install rapid flashing beacons that are pedestrian activated during crossing.
3. Robert Gray Elementary School: Install sidewalks along 46th Avenue from the corner of Windermere Street to Olympia Way.
4. St Helens Elementary School: Improve the Beach Street crossings on 27th and/or 28th with rapid flashing beacons that are pedestrian activated during crossing.
5. Columbia Heights Elementary School: Install rapid flashing beacons at the corner of Hillcrest Drive and/or Parkview Drive and Columbia Heights that are pedestrian activated during crossing.
6. RAL/Monticello/Olympic Schools: Improve walk to school route from Hemlock Street to Washington Way on 28th Avenue. This may include improvements to sidewalk surfaces, ADA corner ramps, alley entrances and lighting.
7. Mint Valley Elementary School: Improve walk to school route along 38th avenue from Ocean Beach to Pennsylvania Street on the Westside of the Street. This may include improvements to sidewalk surfaces and ADA corner ramps.
8. Mount Solo Middle School: Create a walking path connecting Branch Creek Drive to Mount Solo Road.
9. On the 700 and 800 hundred block of Fir Street between 7th and 9th Avenues, build sidewalks. This is a densely populated area where students of all grades are forced to walk on mud paths to access the school bus stops located on 7th, 8th and 9th Avenues.
