DEVELOPING A REGIONAL ATHLETIC/SPORTS COMPLEX

INTRODUCED BY: Councilmember Steve Moon

SUPPORTED BY: Mayor Pro tem Mike Wallin

COUNCIL STRATEGIC INITIATIVE ADDRESSED:

Address quality of place issues
Preserve and enhance neighborhoods
Strengthen economic conditions and create new opportunities

CITY ATTORNEY REVIEW: N/A

SUMMARY STATEMENT:

A strong community with a desire for a higher quality of place requires ample outdoor parks and recreational opportunities for all residents throughout the year. Longview has a long rich history of supporting parks and recreational opportunities and programs. City Council has been hearing the concerns of community members who desire to improve the quality of our community's ball fields. Among the suggestions made by community members is that of a regional athletic/sports complex. The City of Longview has the opportunity with the city's existing parks and underutilized land to potentially develop and meet this need in areas west of 48th Ave. City Council has recently heard from sports facilities experts who have presented information that such a regional athletic/sports complex may also benefit the City of Longview and its residents with improved economic conditions. City Council desires to take action and to proceed with addressing quality of life issues, enhancing our community's neighborhood, and strengthening our economic conditions and creating new opportunities.

RECOMMENDED ACTION:

A motion directing the City Manager to direct the Parks & Recreation Director and Parks and Recreation Board to begin a public process for the purpose of solicitation of proposals through a request for proposals to develop a regional athletic / sports complex and report back to council by September 13, 2018.
